CAREER OBJECTIVE

Motivated third-year Computer Science Engineering student at Anna University BIT Campus, Trichy, with strong skills in Python, Flask, and REST API development. Passionate about backend development and secure application design using JWT authentication. Seeking opportunities to apply my knowledge in real-world projects and internships.

EDUCATION

B.E Computer Science Engineering
Anna University BIT Campus, Trichy
2023 – 2027

SKILLS

- Programming: Python, HTML, CSS
- Frameworks: Flask
- Web Technologies: REST API
- Authentication: JWT (JSON Web Token)
- Concepts: Backend Development, API Development

PROJECTS

- ♦ Portfolio Website
 - Developed a personal portfolio to showcase projects and skills
 - Designed a clean and responsive user interface
- ♦ JWT Authentication System
 - Implemented secure authentication using JWT token creation
 - Managed login, token validation, and protected routes
- ♦ REST API using Flask
 - Built RESTful APIs using Flask framework
 - Handled CRUD operations and API endpoints efficiently

INTERNSHIP

Python Intern (April 2026 – Present)

- Completed initial internship tasks successfully
- Working on real-world Python-based applications
- Collaborating with team members on project development

ACHIEVEMENTS

- Completed 100-day Python bootcamp-Udemy
- completed 100-days of problem solving in python
- Strong interest in backend and API development
